

In the Abstract:

Please replace the paragraph at page 23, lines 3 to 10, with a replacement paragraph amended as follows:

The folding baby carriage is ~~folded~~ foldable so that four wheels approach each other back and forth and from side to side. The baby carriage ~~comprises~~ includes a lower frame structure that is positioned above the four wheels to form a seating surface portion of a seat and ~~folded that is foldable~~ so as to approach back and forth and from side to side with the four wheels, and an inverted U-shaped member extending to rise upward from both sides of the seating surface ~~portion and keeping the same configuration without being bent actually in both opened and folded states.~~ portion. The inverted U-shaped member remains on a single plane in both the folded state and the opened state without bending out of this plane, but lower ends of the inverted U-shaped member come closer together in the folded state.
